What is Aalto Foodsharing?

Foodsharing is a global movement to reduce food waste. The main action is to save food from being thrown away. This is done via cooperations with stores and restaurants.

Aalto Foodsharing is a grassroots initiative to save food waste in Otaniemi. Our intentions are to **minimize food waste, share food amongst students and build a community around sustainability action.** We maintain a community fridge on campus, pick up food waste regularly and organise foodsharing events.

- Meet your partner in front of the pick-up location (eg. K-Market)
- Go inside and ask the manager for leftover food, they already know we come :)
